Subject: Microsoft Settlement

NO settlement with Microsoft should include any of Microsoft's Products, and marketing gimmicks, only cash and further restrictions on their closed source anti-competitive products.

With a 35 Billion cash position and a 1 billion a month income anything else from Microsoft would be an insult.

The damage done SO FAR by Microsoft is miniscule compared to FUTURE losses that will be caused by a monopoly that creates mediocre products.

The US Government and its agencies should use (and promote) OpenSource software and operating systems to save taxpayers money, and not add insult to injury by adding cash to the Microsoft coffers.

Respectfully,

C. Svanberg
